Associate Professor in Robotics

Centre for Autonomous Systems (CAS)
The Royal Institute of Technology - KTH

What is going on in the robot economy?

Petter Ögren
Associate Professor in Robotics

Centre for Autonomous Systems (CAS)
The Royal Institute of Technology - KTH

Outline

- Impact of robotics
- History of robotics
- Autonomous or Teleoperated
- Robotics Today and Tomorrow
 - Threat or Possibility

KTH Centrum for Autonom System, www.cas.kth.se

Robot Impact? (the tech optimist)

- 1:st industrial revolution (mechanics)
- 2:nd industrial revolution (IT)
- 3:rd industrial revolution (IT+mechanics)

KTH Centrum for Autonom System, www.cas.kth.se

Robot impact? (the economist)

<p>Trends</p> <ul style="list-style-type: none"> • Industrial robots <ul style="list-style-type: none"> - 170% growth in sales 2009-11 - Baxter costs 25% less than typical robot • Autonomous Driving <ul style="list-style-type: none"> - 7 miles, 2004 - 1540 miles, 2005 - 300 000+ miles, today 	<p>Impact</p> <ul style="list-style-type: none"> - 12% of jobs in manufacturing (worldwide) - 1000 milj. Vehicles today - 1.5 milj traffic deaths by 2025
--	---

KTH Centrum for Autonom System, www.cas.kth.se

Källa: McKinsey Global Institute

Robot impact? (sci-fi-enthusiast)

- Robots are awesome...
 - But research is so slow!
 - Why?
 - Robotics is difficult
 - Biological system are **amazing**
- Amaras Law: "We tend to overestimate the effect of a technology in the short run and underestimate the effect in the long run." (Roy Amara)

KTH Centrum for Autonom System, www.cas.kth.se

History of Robots

Useful machines
1400BC

Moving dolls
1769, 1921 "Robot", 1926, 2000, 2007, 2015

KTH Centrum for Autonomy System, www.cas.kth.se

Artificial Intelligence

3 Extreme achievements

- Chess, 1997: "Deep blue" wins vs Kasparov
- Driving, 2007: 100km in urban traffic
- Jeopardy, 2011: "Watson" wins vs human champion

All 3 extremely specialized, far from *General Intelligence*

KTH Centrum for Autonomy System, www.cas.kth.se

Autonomy vs Operator Support

- Paradox of Autonomy:
 - "human factor" in operator
 - Autonomy needed
 - "human factor" in engineer/programmer
 - Operator needed
- Combination of Autonomy and Operator
 - Who does what?
 - Advantages?
 - Operator loses focus/skill
 - Automation surprise

KTH Centrum for Autonomy System, www.cas.kth.se

Robotics today and tomorrow

- Autonomous Driving
- Service robots
- Health care robots
- Logistics
- Agriculture
- Industrial robots

• Will the robots take over?...

KTH Centrum for Autonomy System, www.cas.kth.se

Autonomous driving

- Darpa Grand Challenge
 - 2004: tot. 7 miles
 - 2005: tot. 1540 miles
- Darpa Urban Challenge
 - 2007: urban traffic
- Now "towards production"
- Nissan: 2020 product ready!

KTH Centrum for Autonomy System, www.cas.kth.se

Automated Driving – Overview

Autonomous driving (coming soon)

KTH Centrum for Autonomy System, www.cas.kth.se

 Service Robots: Electrolux Trilobite

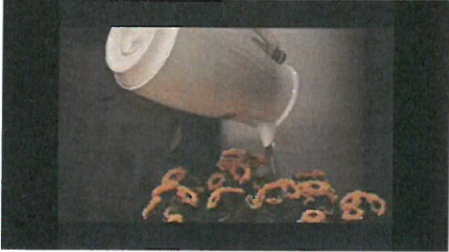

KTH Centrum for Autonomy System, www.cas.kth.se

 Service Robots: Husqvarna

KTH Centrum for Autonomy System, www.cas.kth.se

 Service Robots 

- This is teleoperation...
- Huge challenge to achieve this autonomously

KTH Centrum for Autonomy System, www.cas.kth.se

 Surgical robots: Da Vinci

- Not that autonomous...

KTH Centrum for Autonomy System, www.cas.kth.se

 Logistics and Warehouses

KTH Centrum for Autonomy System, www.cas.kth.se

 KTH team in Amazon Picking Challenge

KTH Centrum for Autonomy System, www.cas.kth.se

Hospital Logistics: RobCab

KTH Centrum for Autonom System, www.cas.kth.se

Agriculture

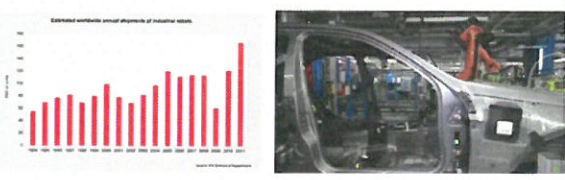

How a drone tractor works

KTH Centrum for Autonom System, www.cas.kth.se

Industrial robots

- 40 years of development
- Car industry still main client

KTH Centrum for Autonom System, www.cas.kth.se

Industrial robots

5 Trends in Industrial robotics

- Pricereduction:
 - 1/3 of price from Gen1→Gen3
- Reliability
 - 5-times MTBF from Gen 1 → Gen 3
- Motion control
 - Position
 - Speed
- Human-Robot collaboration
- Intelligence

KTH Centrum for Autonom System, www.cas.kth.se

New concepts: Baxter

- Safe (but weak)
- Learning by doing (pull wrist and show)
- Pick here, drop there, learn to recognize this
- Eye feedback: next move, internal state
- 22000 USD

KTH Centrum for Autonom System, www.cas.kth.se

New concepts: Opiflex (Västerås)

- Autonomous movement between docking stations
- Gives
 - Flexibility
 - Robustness
- (Easy to program)

KTH Centrum for Autonom System, www.cas.kth.se

 New concepts: ABB YuMi (released 2015)

- Safety
- Human-robot collaboration
- Focus in
 - Easy to program
 - Robust (smart) assembly

KTH Centrum for Autonom System, www.cas.kth.se

 Industrial robot needs

- Short integration time
- Safe
- Collaborate with humans
- Easy to program
 - By demonstration (visual)
 - By demonstration (physical)
 - By learning (AI)
 - By planning (AI)

KTH Centrum for Autonom System, www.cas.kth.se

 Will the robots take over?

- Will the robots take over jobs?
 - Yes
- Will the robots take over the planet?
 - No,
 - ... probably not...

KTH Centrum for Autonom System, www.cas.kth.se

 Will the robots take over jobs?

Andel jobb som försvinner

- -machine operators: 90%
- **-assembly workers** (montör): 90%
- **-train operators**: 90%
- -butchers, chefs, food workers: 87%
- **-construction workers**: 85%
- **-vehicle operators**: 85%
- **-warehouse workers**, mailmen: 78%
- -painters: 75%
- -security staff, cleaners: 65%
- -industrial robot operators: 35%
- -pilots: 32%
- -professional athletes: 22%
- -teachers: 13%
- -politicians: 1.2%

Difficult:

- Dexterity
- Originality
- Social skills

KTH Centrum for Autonom System, www.cas.kth.se

 Will the robots take over the planet?

- "The singularity"
 - Robots get smarter than humans
 - Starts developing themselves
 - Compete for resources
 - Eradicate man...
- Proponents
 - Stephen Hawkin etc. (writers, philosophers, Elon Musk)
- Critics
 - AI-researchers
 - (a conspiracy?..)

KTH Centrum for Autonom System, www.cas.kth.se

 Why do we overestimate AI?

- The public
 - Watches movies (Terminator)
 - Inherently looks for "intelligence and intent"
- Researchers
 - Oversells results (wants appreciation)
 - Oversells future results (needs funding)
 - Invents Names for methods that are design to be misunderstood:
 - Artificial Intelligence
 - Reinforcement Learning
 - Artificial Neural Networks
 - Deep Learning
 - Machine Learning
 - (algorithms that act rational)
 - (parameter optimization)
 - (functions with many parameters)
 - (... even more parameters)
 - (parameter optimization)

KTH Centrum for Autonom System, www.cas.kth.se

 Human brain looks for "Intelligence and Intent"

- Example (clip from 1944)
- **"Your mind is ready and eager to identify agents assign them personality traits and specific intentions"**
- Effect even stronger in robots...

KTH Centrum för Autonom System, www.cas.kth.se

 Singularity Critics

- Russel & Norvig: (AI textbook, Berkeley)
 - "Even with a computer of virtually **unlimited** capacity, we **still would not know how** to achieve the brain's level of intelligence"
- Rodney Brooks:
 - "people who **fear** a runaway AI **misunderstand** what computers are doing **when we say** they're thinking or getting smart"
- Koen Hindrick
 - You would **have to be insane...** I do **not know any** researcher in AI who thinks this is a problem

 Artificial Intelligence

3 Extreme achievements

- Chess, 1997: "Deep blue" wins vs Kasparov
- Driving, 2007: 100km in urban traffic
- Jeopardy, 2011: "Watson" wins vs human champion

All 3 extremely specialized, far from *General Intelligence*

But: *General Intelligence exists (humans), and one day we might understand how to create it...*
